Medical Intensive Care Unit
Advocate Christ Medical Center*

Disclosure(s): Drs. Costello and Shah and the reviewers who contributed to this activity have no relevant financial relationships of interest to disclose. Dr. Marc McDowell is an investigator for a Takeda/Shire investigator-initiated grant. All of the relevant financial relationships listed for this individual have been mitigated.

Purpose: To educate critical care providers on the pathophysiology of hemostasis and coagulopathy in patient with cirrhosis and enable clinicians to design appropriate pharmacologic treatment plans.

Learning Objectives:

Upon completion of this activity, participants should be able to:

- Discuss how to interpret abnormalities of hemostasis and coagulopathy seen in critically ill patients with cirrhosis and describe how to design an appropriate pharmacologic treatment plan
- Describe outcomes comparing fixed to titrated dosing of neuromuscular blocking agents for acute respiratory distress syndrome
- Discuss the role of sodium bicarbonate for adult in-hospital cardiac arrest

Target Audience: Nurses

Type of Activity: Knowledge

Fee: \$10 (or \$70 for all 10 courses). For C4

2022 participants who registered for the live program, please use the access code provided to you by email.

Release and Most Recent Review Date: September 30, 2022

Expiration Date: September 19, 2024

Estimated time to complete activity: 1.0 contact hour CNE

Location: Please visit <https://medicinece.uic.edu/> to participate in this activity.

Continuing Nursing Education Statement:

UI Health is approved as a provider of nursing continuing professional development by the Ohio Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation. (OBN-001-91).

In regard to successful completion and contact hours being awarded: 1.0 Continuing Nursing Education contact hours will be awarded to participants who complete the activity.
