

The Goldilocks Principle: Optimal Antithrombotic Strategies in the Cardiac ICU

Date:

September 25, 2025

Purpose:

To educate nurses on contemporary antithrombotic strategies that optimize outcomes in critically ill cardiac patients.

Target Audience:

Nurses

What you will learn:

- Review the pharmacology of bivalirudin and alternative parenteral anticoagulants used to treat acute coronary syndrome (ACS)
- Review the safety and efficacy of bivalirudin and other parenteral anticoagulants for the treatment of ACS
- Discuss updates in the management of purge solution for patients receiving Impella® support
- Discuss pharmacologic strategies for maintenance anticoagulation during extracorporeal membrane oxygenation (ECMO)

1.0 CNE contact hour(s) will be awarded to participants who attend the entire activity, complete the post-test, and submit an activity evaluation.
